As a user
I want to search for a project name
so that I can view all information of that project

WIREFRAMES:

ACCEPTANCE CRITERIA:

- From the home page, I should be able to navigate to the project search page
- A user can enter a project name to search for
- The name field is mandatory
- If the mandatory field is not filled in or contains invalid information, the form is shown again with an error message.

- After the form is submitted (Search), the search page will give all the information of the requested project
